

Bolaji Jacobson, Software Engineer

Lagos, Nigeria, +2347036140343, adenikejacobson@gmail.com

LINKS	Portfolio , LinkedIn , Github	
PROFESSIONAL SUMMARY	Software Engineer with 3 years of freelance experience building production web applications with Next.js, TypeScript, and TanStack Query. Strong focus on polished, animated interfaces using Tailwind CSS and Framer Motion. Also has hands-on backend and database exposure Supabase-based CRUD and admin tooling on a live client project, plus a database administration internship at Motorola Solutions with PostgreSQL.	
SKILLS	HTML	Next.js
	Git	TailwindCSS
	CSS	Typescript
	Javascript	REST APIs
	React	Paystack
	Supabase	Express
	Tanstack Query	PostgreSQL
	Node.js	Prisma
EMPLOYMENT HISTORY		
Jul 2026 — Present	Full Stack Software Engineer, EL DULCE	Remote
	Freelance engagement — designed and built the digital platform for EL DULCE, a fine-dining restaurant brand in Lagos, Nigeria.	
	- Developed a full stack booking and menu management platform (Next.js, TypeScript, TanStack Query, Supabase) with a public booking system and an admin portal supporting full CRUD over menu content and images - Designed a reservation engine tracking real-time per-date availability across three table sizes and configurable time slots, with admin-managed cancellations that automatically free up slots - Integrated Resend for transactional email and WhatsApp-based booking notifications, and implemented a custom theme toggle system	
Jan 2024 — Present	Software Engineer, Self-Employed	Remote
	- Personal Portfolio — Vite, React, Tailwind CSS, Framer Motion, React Router — animated hero section, scroll-reveal interactions, WhatsApp-integrated contact form - Braids 'n' More — hair braiding business site — React, Tailwind CSS, EmailJS — image carousel, home-service toggle on the booking form, smooth scroll navigation - Paramount Sneakers Store — e-commerce storefront — plain CSS/JavaScript — fully responsive layout across breakpoints via targeted media queries	
Jan 2025 — Dec 2025	Database Adminstration Intern, Motorola Solutions	Remote
	- Wrote and monitored SQL queries against PostgreSQL databases, using PGAdmin to track and improve query performance - Created and maintained databases, connecting to production and staging endpoints and servers as part of day-to-day DBA operations, hosted on AWS - Managed secure access to database infrastructure using HashiCorp Vault and Okta for credential and identity management - Collaborated with the database administration team via Slack, documented processes and findings in Confluence, and used GitHub for version control of scripts and configuration	

Jun 2023 — Dec 2023

Software Engineer Intern, Emstill Solutions

Ogba, Lagos

- Supported the engineering team with bug fixes and QA testing on production software over a 6-month placement
- Contributed to the design of a new user interface for a customer-facing dashboard

EDUCATION

Jan 2021 — Sept 2024

Bsc in Computer Science, Federal University of Agriculture,
Abeokuta

Abeokuta

Thesis: Implementation of Artificial Intelligence into Digital Forensics via Cloud Computing
